

PRESS RELEASE

Monday, March 8, 2021:

The State, the Regional Council of Auvergne-Rhône-Alpes, the Departmental council of Isère and the City of Grenoble wish to testify of their deep attachment to the Magasin - Centre d'art contemporain and, more generally, to the place of visual arts in Grenoble.

Place of exhibition, reception of the artists, of sensitization of the public, it's the fundamental element of the municipal, departmental, regional and national cultural life, that we all agree to want to preserve on the Bouchayer-Viallet site.

The Magasin is going through a delicate period, due to the health crisis and the recent departure of its director.

All the public partners would like to salute the commitment of the President of the association, especially in this period of transition, as well as that of the employees who have accompanied her.

In solidarity and concern for the future of this establishment, the State, Region, Department and City wish that a new direction can be chosen within the framework of the expectations of the label for the centers of art of national interest of the Ministry of Culture and assure the establishment of their financial commitment to it.

A time for reflection and and consultation must be given to the preparation of this new stage so that it can be opened in the best conditions, in the interest of the public service mission, of artists and their audiences, and the staff who contribute to the life of this place.
